

Wordle.net

There are 2 ways to make Wordles

1. Type in Words
2. Type in a website (URL)

Type in the words you wish to use to create a wordle.
The words which you would like to stand out, retype several times.
Once you are ready, copy your work just in case something goes wrong....and click on GO.
Wordle will generate your image and then you can customize with colors, fonts, layouts.
To print your wordle, look below the wordle and choose PRINT.
If you wish, use any PAINT/GRAPHICS program, to make your wordle unique!

The advanced tool lets you type words in one time only and then assign a size and color option.

Advanced

Tips to Remember

1. Use the ~ between words to group them together — such as We The People
2. Right mouse click on a word if you wish to remove it.
3. Under LAYOUT, you can choose how many words you wish to show up. When using speeches, scripture, or any large amount of text....this is a very good tool to use.
4. Different fonts can truly give your wordle a different look — so take the time to look through your choices. (fonts listed on page 2)
5. On the COLOR option, you can edit the palette up to 5 different colors and also the background color.
6. Use the LAYOUT option and choose re-layout to see different views of your wordle. Click on Edit RE-DO to return to previous view.

for more ideas on how to use WORDLE in your classroom.

If your wordle does NOT work you will need to update your JAVA. You can do that at <http://www.java.com/en/download/index.jsp>

To screen capture your wordle, try using Jing

<http://www.techsmith.com/download/jing/default.asp>
